RISK FACTORS FOR BREAST CANCER IN MEN

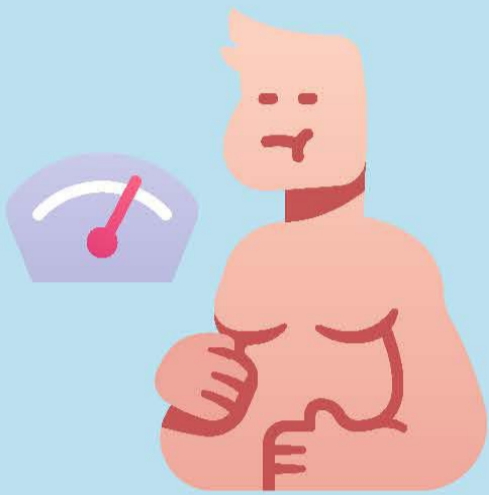

Older age

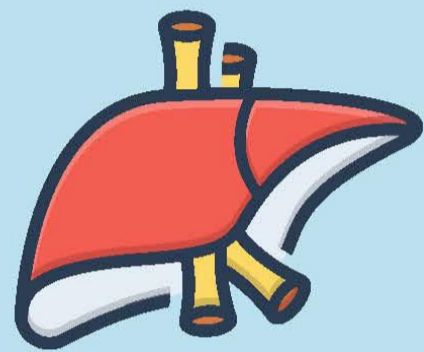

Family history of breast cancer

Breast cell growth - normal and abnormal - is stimulated by the presence of estrogen. Men can have high estrogen levels as a result of the conditions below.

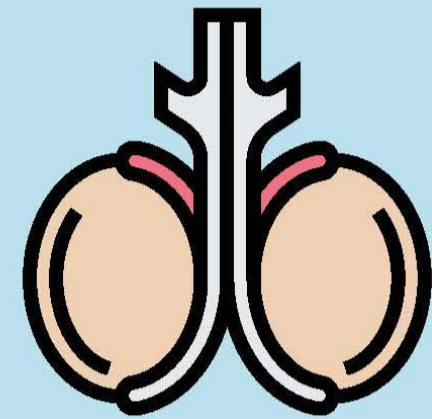

Obesity

Liver cirrhosis

Heavy use of alcohol

Testicular disease or surgery

DIAGNOSIS OF BREAST CANCER IN MEN

Men diagnosed with male breast cancer at an early stage have a good chance for a cure. Your doctor may conduct a number of diagnostic tests and procedures, such as:

Ultrasound

Mammogram
